

What happens if your child needs the expertise of other professionals?

There are occasions when students need the expertise of other agencies. If we think that your child would benefit from further assessments or provision from other professionals we would ask your permission to make a referral. We would discuss the reasons for the request and what the outside agency could do for your child. We would never make a referral without your consent.

Baskerville School is fortunate to have some additional professional expertise in house on a part time bases, such as a Speech and Language Therapist, Occupational Therapist, a counsellor from the Malachi Trust and an Educational Psychologist.

If students would benefit from the services of other professionals such as family support worker, respite care, special educational needs social worker or psychiatrist, the school will assist parents in making a referral.
