

## **We listen to and involve you and your child in decisions about your child's learning**

We recognise that you know your child better than anyone else and that only by working together can we achieve the best outcomes for your child. We help your child to understand his/her strengths and weaknesses and to be able to become self-advocate and be aware of his/her needs in order to make decisions about their learning. Where students cannot do this, we help them make informed and appropriate choices and work with parents in making decisions about students' learning.
